

GIBSON GNANASEHAR

DATA · BUSINESS · RESEARCH ANALYST

Auckland, New Zealand · +64 27 392 1872 · gibson.analytics.nz@gmail.com
[linkedin.com/in/gibsong2](https://www.linkedin.com/in/gibsong2) · github.com/gibsonanalyticsnz

PROFESSIONAL SUMMARY

Master of Business Analytics graduate (University of Auckland) with 12 years of prior business experience in talent and HR operations. Brings a full analytics toolkit — Python, R, SQL, Power BI and machine learning — together with the commercial judgement to frame analysis leaders can act on. Recently completed an industry capstone with Technology Investment Network (TIN), validating the data behind the TIN200 and building a Python pipeline to automate its cleaning. Now seeking a Data, Business or Research/Insights Analyst role with a New Zealand organisation.

TECHNICAL SKILLS

Languages & querying: Python (pandas, NumPy, scikit-learn), R (tidyverse, ggplot2), SQL

BI & data engineering: Power BI (DAX, Power Query), data warehousing, star-schema modelling, ELT, SQLite

Analytics & ML: regression (linear / logistic), clustering, tree-based models, Monte Carlo simulation

Finance & tools: CAPM, DCF / NPV, sensitivity analysis, Excel, ProjectLibre, stakeholder reporting

KEY ANALYTICS PROJECTS

Full write-ups and code: github.com/gibsonanalyticsnz/analytics-portfolio

- **TIN200 Data Foundation & Automation (industry capstone, TIN).** Built a Python pipeline that cleans the raw TIN200 source files in about 30 seconds, and validated 30+ M&A events against primary sources so every published figure is defensible.
- **Customer Segmentation — Bank of Twizel.** Two-step clustering of 9,800 banking customers into four actionable segments, each with a tailored engagement strategy (SPSS).
- **World Happiness Data Warehouse.** SQLite star-schema warehouse integrating SDG, World Happiness and World Bank GNI data, with ELT written in SQL to explain the drivers of national wellbeing.
- **Regression Models (R).** Linear regression predicting e-commerce delivery time (Adj. R^2 0.52), and logistic regression on the drivers of personal-loan uptake for targeting and credit-risk.
- **FinTech Investment Appraisal — RosterLab.** Cost of capital via CAPM and beta (OLS), a five-year free-cash-flow projection, and sensitivity analysis on a NZ\$10M expansion.

PROFESSIONAL EXPERIENCE

Research Analyst — Industry Capstone

Apr – Jun 2026

Technology Investment Network (TIN), Auckland

- Built and validated the data foundation behind the TIN200, New Zealand's largest ranking of technology exporters, against primary sources.
- Developed a Python automation pipeline that cleans the raw source files in about 30 seconds, giving the client a reproducible, audit-ready process.
- Built an analytics layer linking the validated company data to NZ economic context, and flagged a foreign-ownership governance issue for the client.

HR Manager / Flexible Staffing Specialist

Apr 2022 – Mar 2025

Atos Syntel, India

- Built C-suite reports and Power BI dashboards on hiring cost, team performance and salary benchmarking that informed leadership resourcing decisions.

- Led a 15-member specialist sourcing team for critical, revenue-impacting roles, running market and competitor benchmarking analysis.

Assistant Manager – HR

Aug 2017 – Apr 2022

Financial Software & Systems (FSS), India

- Delivered competitive analysis and management reporting on claim control and benefits cost for 2,500+ employees, which drove a policy change.
- Scrum Master on a SAP HRMS implementation, covering cost analysis, weighted vendor evaluation, UAT and rollout to 300+ users.

Senior Executive – HR

May 2014 – Jul 2017

FE fundinfo (Financial Express), UK

- Ran salary benchmarking and restructuring analysis with directors, and managed end-to-end payroll with strict data integrity.

Technical Recruiter

May 2012 – May 2014

Sensiple Software Solutions, India

- Data-driven sourcing and screening of technical talent for US clients across portals, networks and forums.

EDUCATION

Master of Business Analytics (FinTech specialisation) — University of Auckland | *Graduating 2026*

Relevant coursework: data engineering & DataOps, machine learning, Power BI & SQL, Monte Carlo simulation, CRISP-DM.

ACHIEVEMENTS & ELIGIBILITY

- Performance awards — one Silver and two Bronze at Atos Syntel; Best Performer award at FE fundinfo (UK).
- **Work eligibility:** New Zealand Post-Study Work Visa, valid three years (Jul 2026 – Jul 2029); eligible to work full-time in New Zealand.
